For the Owner

Re: ***Addendum No. 1***
Maple & Oak Street Waterline Improvements
Village of Thurston

Date: September 28, 2026

This Addendum forms a part of the contract documents and modifies the original bidding documents dated September 2026 and all previous addenda, if any. Acknowledge receipt of this addendum in the space provided in the bid forms. Failure to do so may subject the bidder to disqualification.

QUESTIONS AND ANSWERS

Q1. Is directionally drilling the open trench applications acceptable? If so, can 8" DIPs DR11 HDPE be utilized in lieu of the proposed C900 DR18? Are casing spacers required with the 16" steel casing? If so, do they need to Stainless Steel or Poly?

A1. Stainless steel casing spacers are required. See Specification Section 331113, Para. 2.18 and 3.12. Directionally drilling the open trench will be considered an acceptable installation method but will require the use of AWWA C900 RJ pipe. HDPE will not be considered for the application. A supplemental bid item has been incorporated into the project to establish the cost for this item. Those areas directionally drilled will not be eligible for compensation under open cut installation and/or surface repair items.

BID FORMS

The Bid Form (SECTION 004100) has been **REVISED** to reflect the addition of Supplemental Bid Items. The revised Bid Form annotated "Addendum No. 1 – September 28, 2026" has been attached to this addendum. All bids submitted for the project must utilize the revised Bid Form. Any bids submitted that do not utilize the revised Bid Form shall be deemed non-responsive.

SPECIFICATIONS

In Specification Section 001200 **ADD** the following paragraph to Section 1.7 after paragraph K.:

L. 8" Waterline (PVC C900 RJ) via Directional Drill – Supplemental Bid Item SB-1

1. Description: The work under this item includes all labor, material and equipment necessary for installation of the pipeline via the directional bore method including the pipe, tracer wire, connections to adjacent piping with the required fittings, blocking, excavation and backfill of all required pits, installation of the reaming hole, pulling the pipe and casing pipe if applicable, verifying the required depth for the bored pipeline based on actual field conditions, and all other associated work.

2. Measurement: Measurement will be made for the length of installed pipe by the directional bore method.
3. Payment: Payment under this Supplemental Bid Item will be made only for those pipe segments where the Owner has provided written authorization to substitute directional drilling for the open-cut installation method indicated in the Contract Documents. Directional drilling quantities approved under this Supplemental Bid Item shall replace the corresponding open-cut quantities and no duplicate payment will be made for the same installed pipe. No separate payment shall be made for surface restoration of areas where installation has been completed via directional bore methods. Unauthorized use of directional drilling shall be at the Contractor's sole expense and will not be eligible for additional compensation.

ADD Specification Section 330507.13 – Horizontal Directional Drilling (Restrained Joint PVC) as enclosed.

PREVAILING WAGES

Division 00, Specification 008800, Prevailing Wage Rates - **REPLACE** the Wage Rate Schedule with the following:

Heavy and Highway – Decision No. OH220260001, Modification No. 5, dated 09/17/2026

Bidders shall utilize this revised decision when compiling their Bid.

SECTION 004100 - BID FORM

VILLAGE OF THURSTON
OAK STREET WATERLINE IMPROVEMENTS

ARTICLE 1 BID RECIPIENT

1.01 Bids will be received until 11:00 A.M., local time, October 1, 2026.

1.02 Bids shall be submitted to:

Village of Thurston
2215 Main Street
Thurston, OH, 43157

1.03 The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an Agreement with Owner in the form included in the Bidding Documents to perform all Work as specified or indicated in the Bidding Documents for the prices and within the times indicated in this Bid and in accordance with the other terms and conditions of the Bidding Documents.

ARTICLE 2 BIDDER'S ACKNOWLEDGEMENTS

2.01 Bidder accepts all of the terms and conditions of the Instructions to Bidders, including without limitation those dealing with the disposition of Bid security. This Bid will remain subject to acceptance for 80 days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Owner.

2.02 Bidder will sign and deliver the required number of counterparts of the Agreement with the bonds, insurance certificates, and other documents required by the Bidding Requirements within 10 days after the Owner's Notice of Award.

ARTICLE 3 BIDDER'S REPRESENTATIONS

3.01 In submitting this Bid, Bidder represents that:

A. Bidder has examined and carefully studied the Bidding Documents, the other related data identified in the Bidding Documents, and the following Addenda, receipt of which is hereby acknowledged.

Addendum No.	Addendum Date
_____	_____
_____	_____
_____	_____

B. Bidder has visited the Site and become familiar with and is satisfied as to the general, local and Site conditions that may affect cost, progress, and performance of the Work.

C. Bidder is familiar with and is satisfied as to all federal, state and local Laws and Regulations that may affect cost, progress and performance of the Work.

D. Bidder has carefully studied all: (1) reports of explorations and tests of subsurface conditions at or contiguous to the Site and all drawings of physical conditions in or relating to existing surface or subsurface structures at or contiguous to the Site (except Underground Facilities) which have been identified in SC-4.02, and (2) reports and drawings of Hazardous Environmental Conditions that have been identified in SC-4.06.

E. Bidder has obtained and carefully studied (or accepts the consequences for not doing so) all additional or supplementary examinations, investigations, explorations, tests, studies and data concerning conditions (surface, subsurface and Underground Facilities) at or contiguous to the Site which may affect cost, progress, or performance of the Work or which relate to any aspect of the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder, including applying the specific means, methods, techniques, sequences, and procedures of construction expressly required by the Bidding Documents to be employed by Bidder, and safety precautions and programs incident thereto.

F. Bidder does not consider that any further examinations, investigations, explorations, tests, studies, or data are necessary for the determination of this Bid for performance of the Work at the price(s) bid and within the times and in accordance with the other terms and conditions of the Bidding Documents.

G. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents.

H. Bidder has correlated the information known to Bidder, information and observations obtained from visits to the Site, reports and drawings identified in the Bidding Documents, and all additional examinations, investigations, explorations, tests, studies, and data with the Bidding Documents.

I. Bidder has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Bidding Documents, and the written resolution thereof by Engineer is acceptable to Bidder.

J. The Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for the performance of the Work for which this Bid is submitted.

K. Bidder will submit written evidence of its authority to do business in the state where the Project is located not later than the date of its execution of the Agreement.

ARTICLE 4 FURTHER REPRESENTATIONS

4.01 Bidder further represents that:

A. This Bid is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity with any agreement or rules of any group, association, organization or corporation;

B. Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid;

C. Bidder has not solicited or induced any individual or entity to refrain from bidding; and

D. Bidder has not sought by collusion to obtain for itself any advantage over any other Bidder or over Owner.

ARTICLE 5 BASIS OF BID

5.01 Bidder will complete the Work in accordance with the Contract Documents for the following price(s):

BID FORM

VILLAGE OF THURSTON
OAK STREET WATERLINE IMPROVEMENTS

The following prices per item shall be for furnishing and installing the various items of material and work as specified and shown on the Drawings and described in the Specifications for the following listed prices. Bidder acknowledges that Unit Prices have been computed in accordance with Paragraph 11.03.B of the General Conditions. Bidder acknowledges that estimated quantities are not guaranteed and are solely for the purpose of comparison of Bids, and final payment for all Unit Price Bid Items will be based on actual quantities, determined as provided in the Contract Documents.

All specified cash allowances are included in the price(s) set forth below and have been computed in accordance with Paragraph 11.02 of the General Conditions.

A price must be bid for each item in the Bid, even though the estimated quantity is zero. Unbalanced or unreasonable unit prices may cause rejection of the Bid. All words and numbers shall be in ink.

Item	Description	QTY	Unit	Labor	Material	LUMP SUM PRICE BID
1	Mobilization / Demobilization	1	LS	$_____	$_____	$_____
2	Furnish and install complete, 8-inch C900 Waterline	1,900	LF	$_____	$_____	$_____
3	Furnish and install complete, 8-inch C900 Waterline (RJ) with 16-inch Steel Casing	80	LF	$_____	$_____	$_____

SB-1	8" Waterline (PVC C900 RJ) via Directional Drill	100	LF	$_____	$_____	$_____

ARTICLE 6 TIME OF COMPLETION

6.01 Bidder agrees that the Work will be substantially complete within 150 calendar days after the date when the Contract Times commence to run as provided in Paragraph 2.03 of the General Conditions and will be completed and ready for final payment in accordance with Paragraph 14.07.B of the General Conditions within 180 calendar days after the date when the Contract Times commence to run.

6.02 Bidder accepts the provisions of the Agreement as to liquidated damages in the event of failure to complete the Work within the Contract Times.

ARTICLE 7 ATTACHMENTS TO THIS BID

7.01 The following documents are attached to and made a condition of this Bid:

A. Required Bid security in the form of _____ in the
(Bid Guaranty, Bond, Check, et al.)
amount of _____ Dollars ($ _____)

as required by the Instructions to Bidders.

B. Bidder's Qualifications.

C. Non-collusion Affidavit.

D. Certification of Non-Segregated Facilities.

E. Proposal Affidavit.

F. Contractor Equal Employment Opportunity Certification.

G. Certification Regarding Debarment, Suspension and Other Responsibility Matters.

H. DBE Data Sheets (Forms 6100-4 and 6100-3).

I. American Iron and Steel Acknowledgement.

ARTICLE 8 DEFINED TERMS

8.01 The terms used in this Bid with initial capital letters have the meanings stated in the Instructions to Bidders, the General Conditions, and the Supplementary Conditions.

ARTICLE 9 COMMUNICATIONS

9.01 Communications concerning this Bid shall be addressed to the address of Bidder indicated below:

Name: _____

Street: _____

City, State, Zip Code: _____

Phone: _____ Fax: _____

Email: _____

ARTICLE 10 BID SUBMITTAL

10.01 Bid Submittal Date: _____, 20_____.

10.02 State Contractor License No. _____. (if applicable)

10.03 This Bid submitted by:

END OF SECTION

ADDENDUM 1

SECTION 330507.13 – HORIZONTAL DIRECTIONAL DRILLING (RESTRAINED JOINT PVC)

PART 1 - GENERAL

1.1 DESCRIPTION

A. Work included: Furnish all labor, materials, tools and equipment necessary to provide for installation of restrained joint PVC water pipeline using current horizontal directional drilling technology in accordance with the Drawings and as specified herein.

B. General: This specification defines the approved method and material for the installation of water lines utilizing horizontal directional drilling technology.

C. Definition: Horizontal directional drilling (HDD) involves utilization of an electronically tracked bore-head to guide the borehole to a pre-designed configuration. The HDD process begins with boring a small, horizontal pilot hole with a continuous string of steel drill rod. When the bore-head and rod emerge on the opposite end of the crossing, a back reamer is attached to the drill rod string and pulled back through the pilot hole. The reamer serves to enlarge the pilot hole to allow the restrained joint PVC pipe to be pulled through from the opposite end of the borehole. The size of the drilling equipment and required support equipment shall be determined by the Contractor based on the diameter and length of pipe to be installed.

1.2 QUALITY ASSURANCE

A. Qualifications of manufacturers: Products used in this Work shall be produced by manufacturers regularly engaged in the manufacture of similar items and with a history of quality production acceptable to the Owner.

B. Contractor Certification: Contractor shall be certified by the particular horizontal directional drilling manufacturer that Contractor is a fully trained user of the drilling equipment.

1.3 SUBMITTALS

A. General: All submittals shall be made in accordance with Section 013300 of these Specifications. Contractor shall furnish engineering data covering design and installation. Submittal shall be made in a timely manner so that the project schedule can be met.

B. Shop drawings: As a minimum, the following data and shop drawing information shall be submitted to the Owner for review and approval:

1. Before beginning work, Contractor shall submit to the Owner for approval, the Vendor’s shop drawings, catalog data and specific manufacturer's technical data showing complete information on material composition, physical properties, and

dimensions of new pipe and fittings. Include manufacturer's recommendations for handling, storage, and repair of pipe and fittings, which are damaged.

2. Contractor shall submit certification of workmen training for all personnel involved in installation of pipe.
3. Contractor shall submit a work plan to the Owner for acceptance. Work plan shall address preparation steps required for pre-installation.
4. Contractor shall submit information to the Owner for approval of the procedure and the steps to be followed for installation of the restrained joint PVC pipe utilizing horizontal directional drilling technology, even if the process is named in the specification. Any proposed changes in installation procedures shall require submittal of revised procedures for acceptance by the Owner.
5. Contractor shall submit to the Owner for approval, full details about component materials and their properties, except those protected by trade secrets which may harm their claim to the product.

1.4 PRODUCT HANDLING

A. Handling of materials:

1. All materials furnished by the Contractor shall be delivered and distributed by the Contractor.
2. Pipe, fittings, etc., shall be loaded and unloaded by lifting with hoists or skidding so as to avoid shock or damage. Under no circumstances shall such materials be dropped. Pipe handled on skidways shall not be skidded or rolled against pipe already on the ground.
3. In distributing the material at the site of work, each piece shall be unloaded opposite or near the place where it is to be laid in the trench.
4. Pipe shall be so handled that no damage shall occur. If any part of the pipe is damaged, Contractor shall replace damaged material at his expense.

B. Storage of Materials: Contractor shall be responsible for safe storage of material until it has been incorporated in completed Project. Interiors of all pipe, fittings and other accessories shall be kept free from dirt and foreign matter at all times.

1.5 UTILITY NOTIFICATION

A. Contractor shall be responsible for notifying the Ohio Utilities Protection Service (OUPS) and other applicable underground utility protection services a minimum of 48 hours prior to any excavating operations in accordance with the requirements of the Ohio Revised Code.

1.6 WARRANTY

A. All equipment and materials supplied under this Section shall be warranted to be free from defects in materials and workmanship for a minimum of one (1) year following acceptance by the Owner.

PART 2 - PRODUCTS

2.1 MATERIALS

A. PVC Restrained Joint Pipe (C900-RJ):

1. Materials: Restrained joint PVC pipe meeting the requirements of AWWA C900 shall be used for water lines within directional drill applications where designated. Pipe shall be C900/RJ Certa-Lok® PVC Pressure Pipe as manufactured by North American Pipe, Eagle Loc 900™ Internal Joint Restraint Pipe as manufactured by J.M. Eagle, or approved equal.
2. Dimensions: Nominal outside diameters and wall thicknesses of restrained join pipe shall conform to the requirements of AWWA C900. Restrained joint pipe shall be furnished in 4", 6", 8", 10" and 12" sizes, in Class 165(DR25), Class 235(DR18) and/or Class 305(DR14) as designated on the Drawings. Pipe shall be furnished in standard lengths of 20 feet.
3. Manufacturer’s Instructions: PVC pipe shall be installed according to the manufacturer's written instructions for installation by horizontal directional drilling.
4. Joints: Pipes shall be joined using restrained joints which have been designed with the pipe as an integral system for maximum reliability and interchangeability. The joints shall have been designed with consideration of installation of the pipe by horizontal directional drilling methods.
5. Solvent-weld cement joints shall not be allowed.

B. PVC Restrained Joint Pipe (Pressure Rated PVC-ASTM D2241-RJ):

1. Materials: Restrained joint PVC pipe meeting the requirements of ASTM D2241 shall be used for water lines within directional drill applications where designated. Pipe shall be Certain-Teed Products Corp., Valley Forge, Pennsylvania; John-Manville, New York, New York; Anesite Division, Clow Corporation, Chicago, Illinois; or approved equal.
2. Composition: Material used to produce the pipe shall conform to ASTM D1784, Type 1, Grade 1, 2000 PSI design stress.
3. Dimensions: The standard dimensional ratio for the pipe shall be SDR 21 through 17.
4. Standard: All PVC pipe shall conform to the latest revisions of ASTM Specification D2241 and Department of Commerce Specification PS22-PR (SDR-PR) for pressure rated pipe.
5. Manufacturer’s Instructions: PVC pipe shall be installed according to the manufacturer's written instructions for installation by horizontal directional drilling.
6. Joints: Pipes shall be joined using restrained joints which have been designed with the pipe as an integral system for maximum reliability and interchangeability. The joints shall have been designed with consideration of installation of the pipe by horizontal directional drilling methods.
7. Solvent-weld cement joints shall not be allowed.

2.2 EQUIPMENT

A. Directional Drilling Machine:

1. Directional drilling equipment shall be self-powered and self-contained. Equipment shall be designed and manufactured with an electronically tracked bore-head so as to guide the borehole to a desired configuration, both horizontally and vertically.
2. Directional drilling equipment shall generate sufficient torque and thrust/pullback force to drill a pilot hole, enlarge the pilot hole by back reaming and pull the pipeline back through the enlarged hole.
3. Contractor shall comply with manufacturers specifications as to the machine size requirement for a given diameter and length of pipe, as well as parameters of the required size machine for percentage of upsize allowed.

B. Vacuum Excavation Unit:

1. Directional drilling operations shall be assisted by use of an adequately sized vacuum excavation system mounted on either a trailer or truck body.
2. Vacuum excavation system shall provide sufficient storage tank capacity and power pack to efficiently remove drilling fluid from the insertion pit during horizontal directional drilling operations.
3. Vacuum excavation system shall be equipped with a high-pressure water system designed to assist with “pothole” excavation operations.

C. Drilling Fluid Management System:

1. Directional drilling operations shall be assisted by use of a truck mounted drilling fluid mixing system.
2. Fluid management system shall include two mixing tanks to allow for flexibility in mixing, transferring and delivering drilling fluid.
3. Fluid management system shall have the capability to transfer between tanks while providing drilling fluid to the directional drilling machine.

2.3 TRACER WIRE

A. Tracer wire for directional boring installation shall be a 12 AWG solid and shall be RoHS Compliant wire. Tracer wire for directional boring installation shall be made in the USA.

B. Conductor shall be hard-drawn, 21% IACS, copper clad steel, utilizing a AISI 1065 high carbon steel core (required to meet break load), with rated break load of 1,330 lbs (260,000 psi).

C. Conductor shall be extruded with a 45 mil, high-density, high molecular weight polyethylene (HMW-HDPE) pursuant to ASTM D1248 standard. Insulation color shall meet the APWA color code standard for identification of buried utilities.

D. Tracer wire shall be PRO-TRACE HDD-CCS PE45 as manufactured by Pro-Line Safety Products, SoloShot Extra High Strength Tracer Wire as manufactured by Copperhead Industries LLC, or approved equal.

E. Tracer wire utilized through the directional drill area shall terminate on either side of the directional drill area in a in ground/at grade tracer wire terminal box that will serve as an access point and terminal. The terminal box shall be specifically designed for use with tracer wire systems and shall be equipped with a color coded lid to indicate the proposed utility application. Terminal boxes shall be appropriate for use in roadway or non-roadway locations as required by the location of the directional drill terminations as shown in the Drawings.

PART 3 - EXECUTION

3.1 GENERAL

A. It is the responsibility of the Contractor to implement means and procedures compatible with anticipated ground conditions.

B. The Engineer and Owner must be notified immediately if any condition is encountered that stops the forward progress of drilling operations. The Contractor and Engineer must review the situation and jointly determine the feasibility of continuing drilling operations. When it is determined that it is impossible to continue drilling operations, the Contractor will be allowed to abandon the completed portion in place and start a new hole as directed by the Owner and Engineer.

C. The Contractor shall allow sufficient lengths of product pipe to extend past the termination point to allow connections to adjacent pipe sections or manholes. Pulled pipe shall be allowed 48 hours of stabilization prior to making tie-ins or prior to backfill grouting of the pipe. The length of extra product pipe shall be at the Contractor's discretion.

D. Waterline pipe shall have no deflection, which exceeds the pipe manufacturer's recommendation for the specific material.

E. Contractor shall develop and maintain a "Frac-Out" Contingency Plan to establish procedures for addressing potential impacts associated with the inadvertent release of drilling fluid during the directional drilling of identified resource crossings.

3.2 HORIZONTAL DIRECTIONAL DRILLING OPERATION AND PIPE INSTALLATION

A. Installation Procedures - General: All approved installation instructions and procedures submitted shall be carefully followed during installation. Any proposed changes in installation procedures shall require submittal of revised procedures and acceptance by the Owner.

1. Equipment used to perform the work shall be located as far away from buildings as possible. Provide enclosed, insulated power packs for all mechanical equipment to reduce machine noise, as required to meet local requirements.
2. Contractor shall install all pulleys, rollers, bumpers, alignment control devices and other equipment required to protect existing structures, and to protect the pipe from

damage during installation. Lubrication shall be used as recommended by the manufacturer. Under no circumstances will the pipe be stressed beyond its elastic limit.

B. Pipe Joining of Restrained Joint PVC Pipe:

1. Restrained joint PVC shall be assembled and joined at the site using couplings designed with the pipe as an integral system. Threaded or solvent-cement joints and connections shall not be permitted.

3.3 TRACER WIRE INSTALLATION

A. Tracer wire within directional drilled areas shall be installed in accordance with the tracer wire manufacturer's recommendations.

B. Two tracer wires shall be pulled back through the bored hole with the pipe. Wire shall be tested for continuity after installation. At least one wire must have continuity.

C. Ends of wires with continuity shall be terminated in a terminal box that shall serve as both an access point and a terminal point. The top of the terminal box shall be installed flush with the ground at each end of the directionally bored section.

D. If none of the wires has continuity, new wire shall be installed by the Contractor to provide a continuous wire for location purposes at no additional expense to the Owner.

E. Tracer wire splices within directional drill areas shall be avoided unless approval has been obtained from the Owner.

3.4 CARE AND RESTORATION OF PROPERTY

A. All heavy equipment shall be operated with care to prevent damage to existing structures and/or wires.

B. On paved surfaces, the Contractor shall not use or operate tractors, bulldozers, or other power-operated equipment the treads or wheels of which are so shaped as to cut or otherwise damage such surfaces.

C. All surfaces which have been damaged by the Contractor's operations shall be restored to a condition at least equal to that in which they were found immediately prior to the beginning of operations. Suitable materials and methods shall be used for such restoration.

D. Restoration of existing property or structures shall be done as promptly as practicable and shall not be left until the end of the construction period.

3.5 PROTECTION OF EXISTING STRUCTURES, PRIVATE PROPERTY, AND RIGHTS-OF-WAY

A. All existing pipes, poles, wires, fences, curbing, property-line markers, and other structures which, in the opinion of Owner must be preserved in place without being temporarily or permanently relocated, shall be carefully supported and protected from injury by Contractor, and in case of injury, Contractor shall notify the appropriate party so that proper steps may be taken to repair any and all damage done. When the owners do not wish to make the repairs themselves, all damage shall be repaired by Contractor, or, if not promptly done by him, Owner may have the repairs made at expense of Contractor.

B. The Contractor shall consult the Owner or his representatives prior to removing or disturbing any tree, shrub, bush, fence, sidewalk, building structure, or improvement that may be encountered in the line of the water line or in the path of the easement, or right-of-way secured by the Owner. Immediately upon completion of sewer line rehabilitation through each piece of private property, the Contractor shall replace the sod, lawns, bushes, shrubs, or whatever else may have been removed, disturbed or altered during the progress of the work.

PART 4 - FRAC-OUT CONTINGENCY PLAN GENERAL OUTLINE

4.1 INTRODUCTION

A. Installation of the pipeline will involve horizontal directional drilling of identified resource crossings (i.e. streams, wetlands, roads, etc.). Although directional drilling is a much less intrusive method of crossing than open-trench cutting, there is a possibility of a surface disturbance if a “frac-out”, or inadvertent return of drilling fluid, occurs during the drilling process. Releases are typically caused by the pressurization of the drill hole beyond the containment capability of the overburden soil. Therefore, the type of material and the depth of overburden are key factors in preventing a frac-out.

B. The purpose of this Frac-out Contingency Plan is to establish procedures for addressing potential impacts associated with the inadvertent release of drilling fluid during the directional drilling of identified resource crossings. Every effort will be made to prevent a drilling fluid loss from becoming a seepage to the ground surface, stream or wetland. This will be done by maintaining proper drilling fluid parameters (viscosity, mud weight, solids content, etc.) and using controlled drilling practices (fluid pressure, drilling rate, flowrate, trip speed, etc.).

4.2 DRILLING ENTRANCE AND EXIT POINTS

A. A temporary sediment barrier will be installed prior to drilling operations to contain potential releases where determined necessary based on field conditions at the time of drilling.

4.3 TERRESTRIAL AREAS

A. When a frac-out is suspected while drilling a terrestrial area:

1. The contractor will temporarily suspend forward progress of the drilling operations if excessive loss of bentonite circulation is noted and the surface of the drill path will be examined for release. The drilling equipment should continue to operate, at reduced pressure, so that the drilling hole does not collapse.
2. If a surface release has occurred, isolate the area with hay bales, sand bags, or silt fencing to contain the spread of bentonite.
3. The contained bentonite area will be left in place to dry
4. The dried bentonite will be removed to grade and used as backfill around the pipeline.
5. Surface releases can also be removed by the use of a vacuum truck where appropriate.
6. The affected areas will be restored as closely as possible to their previous condition.
7. After containment has been achieved, the drilling contractor and the inspector will make every effort to determine why the frac-out occurred and develop corrective measures to minimize the chance of recurrence.

4.4 WETLANDS

A. When a suspected frac-out is identified while drilling a wetland area:

1. The contractor will temporarily suspend forward progress of the drilling operations if excessive loss of bentonite circulation is noted and the surface of the drill path will be examined for release. The drilling equipment should continue to operate, at reduced pressure, so that the drilling hole does not collapse.
2. If a surface release has occurred, isolate the area with hay bales, sand bags, or silt fencing to contain the spread of bentonite.
3. Contact the environmental inspector for the project to document the release and direct the clean-up operations. The Ohio EPA shall be notified of the frac-out.
4. The contained bentonite area will be left in place to dry to avoid potential damage from vehicles entering the area.
5. The dried bentonite will be removed to grade by the use of hand shoveling or the use of small-mechanized equipment outside the wetland area.
6. The bentonite will be used as backfill around the pipeline.
7. The affected areas will be restored as closely as possible to their previous condition.
8. After containment has been achieved, the drilling contractor and the inspector will make every effort to determine why the frac-out occurred and develop corrective measures to minimize the chance of recurrence.

4.5 SMALL STREAMS

A. When a suspected frac-out is identified while drilling a small stream crossing:

1. The contractor will temporarily suspend forward progress of the drilling operations if excessive loss of bentonite circulation is noted and the surface of the drill path will be examined for release. The drilling equipment should continue to operate, at reduced pressure, so that the drilling hole does not collapse.
2. If a surface release has occurred, check effectiveness of the sediment barrier, make necessary repairs.

3. Contact the environmental inspector for the project to document the release and direct the clean-up operations. The Ohio EPA shall be notified of the frac-out.
4. Remove the bentonite by shovel or vacuum truck. The bentonite can be used as pipeline backfill.
5. The affected areas will be restored as closely as possible to their previous condition.
6. After containment has been achieved, the drilling contractor and the inspector will make every effort to determine why the frac-out occurred and develop corrective measures to minimize the chance of recurrence.

4.6 RESPONSE PERSONNEL

A. In the event of a frac-out, the person discovering the release will notify the following individuals and initiate the appropriate response steps. The Contractor personnel will notify appropriate agencies and obtain any clearances necessary for clean-up operations. The Contractor project personnel and HDD contractor manager will coordinate all response activities.

==========

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this

contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at https://www.dol.gov/agencies/whd/government-contracts.

Note: Executive Order 13658 generally applies to contracts subject to the Davis-Bacon Act that were awarded on or between January 1, 2015 and January 29, 2022, and that have not been renewed or extended on or after January 30, 2022. Executive Order 13658 does not apply to contracts subject only to the Davis-Bacon Related Acts regardless of when they were awarded. If a contract is subject to Executive Order 13658, the contractor must pay all covered workers at least $13.65 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract from May 11, 2026, through December 31, 2026. The applicable Executive Order minimum wage rate will be adjusted annually. Additional information on contractor requirements and worker protections under Executive Order 13658 is available at www.dol.gov/whd/govcontracts.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (iii)).

The body of each wage determination lists the classifications and wage rates that have been found to be prevailing for the type(s) of construction and geographic area covered by the wage determination. The classifications are listed in alphabetical order under rate identifiers indicating whether the particular rate is a union rate (current union negotiated rate), a survey rate, a weighted union average rate, a state adopted rate, or a supplemental classification rate.

Union Rate Identifiers

A four-letter identifier beginning with characters other than SU, UAVG, SA, or SC denotes that a union rate was prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2024. PLUM is an identifier of the union whose collectively bargained rate prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. The date, 07/01/2024 in the example, is the effective date of the most current negotiated rate.

Union prevailing wage rates are updated to reflect all changes over time that are reported to WHD in the rates in the collective bargaining agreement (CBA) governing the classification.

Union Average Rate Identifiers

The UAVG identifier indicates that no single rate prevailed for those classifications, but that 100% of the data reported for the classifications reflected union rates. EXAMPLE: UAVG-OH-0010 01/01/2024. UAVG indicates that the rate is a weighted union average rate. OH indicates the State of Ohio. The next number, 0010 in the example, is an internal number used in producing the wage determination. The date, 01/01/2024 in the example, indicates the date the wage determination was updated to reflect the most current union average rate.

A UAVG rate will be updated once a year, usually in January, to reflect a weighted average of the current rates in the collective bargaining agreements on which the rate is based.

Survey Rate Identifiers

The SU identifier indicates that either a single non-union rate prevailed (as defined in 29 CFR 1.2) for this classification in the survey or that the rate was derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As a weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SUFL2022-007 6/27/2024. SU indicates the rate is a single non-union prevailing rate or a weighted average of survey data for that classification. FL indicates the State of Florida. 2022 is the year of the survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. The date, 6/27/2024 in the example, indicates the survey completion date for the classifications and rates under that identifier.

SU wage rates typically remain in effect until a new survey is conducted. However, the Wage and Hour Division (WHD) has the discretion to update such rates under 29 CFR 1.6(c)(1).

State Adopted Rate Identifiers

The SA identifier indicates that the classifications and prevailing wage rates set by a state (or local) government were adopted under 29 C.F.R 1.3(g)-(h). Example: SAME2023-007 01/03/2024. SA reflects that the rates are state adopted. ME refers to the State of Maine. 2023 is the year during which the state completed the survey on which the listed classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. The date, 01/03/2024 in the example, reflects the date on which the classifications and rates under the SA identifier took effect under state law in the state from which the rates were adopted.

WAGE DETERMINATION APPEALS PROCESS

1) Has there been an initial decision in the matter? This can be:

a) a survey underlying a wage determination
b) an existing published wage determination
c) an initial WHD letter setting forth a position on a wage determination matter

d) an initial conformance (additional classification and rate) determination

On survey related matters, initial contact, including requests for summaries of surveys, should be directed to the WHD Branch of Wage Surveys. Requests can be submitted via email to davisbaconinfo@dol.gov or by mail to:

Branch of Wage Surveys
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

Regarding any other wage determination matter such as conformance decisions, requests for initial decisions should be directed to the WHD Branch of Construction Wage Determinations. Requests can be submitted via email to BCWD-Office@dol.gov or by mail to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2) If an initial decision has been issued, then any interested party (those affected by the action) that disagrees with the decision can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Requests for review and reconsideration can be submitted via email to dba.reconsideration@dol.gov or by mail to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210.
