Re: *Addendum No. 2*
Rock Swale Sewer Improvements Phase 1
City of Marion

Date: November 14, 2024

This Addendum forms a part of the contract documents and modifies the original bidding documents dated October 2024 and all previous addenda, if any. Acknowledge receipt of this addendum in the space provided in the bid forms. Failure to do so may subject the bidder to disqualification.

QUESTIONS & ANSWERS (INCLUDES PRE-BID MEETING SUMMARY & SIGN IN)

- Q1. Are Build American Buy American (BABA) guidelines required for material procurement?
A1. No. Project is federally funded but does NOT require materials to meet the specific guidelines in the BABA Act.
- Q2. Is access to hydrants permitted and who is responsible to pay for the water used?
A2. All Contractor's may contact the local Aqua Ohio contact Don Scott who will be able to provide provisions, protocols, and cost associated with hydrants and the subsequent water use. The Contractor is solely responsible to determine and coordinate their source for water necessary to complete their work and no additional payment will be made for the any time or costs associated with this work.
- Q3. Will Contractor's have access to GIS or any sewer mapping?
A3. Atlas maps are included as a part of this addendum and are to be used for reference only. The sewer alignments on the drawings were surveyed and in general reflect the location of manholes and the alignment of the sewer.
- Q4. Was any flow monitoring performed and how were the flows determined in the 330130.03 Sewer Flow Control?
A4. The flows were obtained from a calibrated hydraulic and hydrologic (H&H) model that was completed by a separate consultant under a different project. This data utilized flow monitoring at the upstream and downstream end of this sewer. Flows are based on the average dry-weather flow in the sewer and the project peak flow observed in the model between MH1 and MH12A.

Q5. Is it anticipated that bypass pumping is necessary for dry weather and more notably will be necessary for wet-weather flows?

A5. The Contractor is responsible to determine the ultimate means and methods they are able to safely and effectively install the specified improvements within put causing additional damage within the sewer they are working in or causing disturbances to the flow or sewer directly up or downstream of the proposed work that of which may cause basement backups, flooding out of manholes, or buildup of debris that restricts flow within the sewer.

If the Contractor does not believe bypass pumping is necessary, they may elect to temporarily plug or dam flow upstream of the work while doing improvements. Similar to bypass pumping, temporary plugs or damming shall not cause any disturbances to the flow or sewer directly up or downstream of the proposed work that of which may cause basement backups, flooding out of manholes, or buildup of debris that restricts flow within the sewer. Any buildup or damage that may occur due to this will be the responsibility of the Contractor to clean and remove and/or remediate at their cost.

Q6. Is there consideration to altering the method of payment for bypass pumping?

A6. Bypass pumping pay items have been removed and added under Part 1 General Items in the Prices to Include. The Contractor is responsible to determine their means and methods for maintaining or bypassing flow for during the course of all work and costs associated with the noted flow management or bypass shall be incorporated into all pay items.

Q7. Will alternative manhole types and methods of installation be allowed in lieu of the specified manholes?

A7. Any modification that differs from the specified manhole improvements or manhole replacement types shall require approval by the Engineer. Any modification to manhole improvements or other sewer improvements must meet at minimum the equivalent specified design criteria, match the general intent of the noted improvement, and not require any additional work not currently specified in order to install such alternative. If additional work is required that is not currently specified or noted, then the Contractor shall include that in the cost of their alternative method (pending approval by the Engineer).

It is generally recommended to send any alternative means or methods prior to the opening of bids for approval for there is not implied or actual guarantee that alternative methods will be approved after the awarding for bid.

Q8. Will detours be allowed and who is responsible for implementing and maintaining?

A8. Yes, detours are permitted, but will still need to be approved by the Engineer prior to implementing. The Contractor is responsible for implementing and maintaining detours and any other traffic control devices or methods necessary to complete their work.

Addendum No. 2

Date: November 14, 2024

Page 3

Q9. Is Channeline GRP panels an accepted manufacturer for the slip lining?

A9. Yes.

Q10. Is there access to CCTV videos, PACP and MACP Logs, and Laser Profiling?

A10. Yes. See links:

Soil Borings – Summary of Work Item 1.4 A. 1 - Forthcoming

Q11. Will the Contractor be permitted to work continuously beyond normal work hours (7AM-7PM)?

A11. Yes, but the Contractor will still be required to formally submit a schedule for work with start and stop times and dates for such work. All work outside of the normal work hours will require approval by the Owner

Q12. Will road closures and detours be permitted?

A12. Yes. All detour plans will need to be designed in accordance with the bid documents and ODOT regulations. The Contractor will need to submit their plan to the Owner for approval prior to implementation. The Contractor is also responsible for all costs necessary to implement road closures and detour routes. An road closure shall allow for local traffic to be able to access any homes or businesses within the road closure limits.

Q13. What is the maintenance bond length for the project?

A13. Two (2) years. See Specific Project Requirements, Item 4.

Q14. Do the pumps for bypassing have to be noise attenuating?

A14. No, unless they are located within 500' of a residential property.

Addendum No. 2

Date: November 14, 2024

Page 4

Q15 Would you consider Quadex Quad-Plug as an approved equal per Section 330130.81 Part 2.9-B?

A15. No.

Q16. Would you consider Quadex Hyperform an approved equal per Section 330130.81 Part 2.9-C?

A16. Yes.

Q17. Would you consider the Quadex I&I Guard Family as approved grouts per Section 330130.63 Part 2.1?

A17. Yes.

Q18. Would you consider United Felts an approved CIPP Liner manufacturer per section 330130.72?

A18. Yes.

BID DOCUMENTS

Replace Prices to Include, Pages BD.9A to BD.16A, with the enclosed Prices to Include, Pages BD.9B to BD.15B.

BID FORMS

Replace Bid Form, Pages BF.9 to BF.11, with the enclosed Bid Form, Pages BF.9A to BF.11A. A pay item “Void Fill and Seal, As Per Plan” has been added to Alternates A, B, and C.

PREVAILING WAGES

Section 8, Prevailing Wage Rates - **Replace** the Wage Rate Schedule with the following:

Heavy and Highway – Decision No. OH20240001, Modification No. 9, dated 11/08/2024

Bidders shall utilize this revised decision when compiling their Bid.

Pre-Bid Meeting Summary

CT JOB#: 242019

PROJECT: Roch Swale Sewer Improvements Phase I

OWNER: City of Marion

LOCATION: City of Marion, Marion County, Ohio

OPINION OF PROBABLE CONSTRUCTION COST: Base - \$400,000 Alternates - \$2,500,000

BID OPENING DATE: Thursday, December 5, 2024 at 12:00 PM in Council Chambers

COMPLETION DATE: December 19, 2025

MEETING INFORMATION: November 7, 2024 @ 10:30 AM Location: Marion City Hall

CONTRACT HIGHLIGHTS:

All questions during bidding should be addressed to Mr. Tim McLaughlin P.E. Questions during meeting (to be answered formally through addendum). Request that all questions asked today be submitted via email to ensure they are answered properly.

AGENDA:

1. Introductions – CT team/Marion Staff; introductions around the room
2. Description of Project:
 - a. The project is for improvements of the 72” double-wall brick combined sewer and corresponding brick wall manholes along Holland Road. The project includes a Base Bid with three (3) Alternates:
 - i. Base Bid: Manhole Rehabilitation Improvements
 1. Manhole Improvement Schedule
 2. Special Deduct
 - ii. Alternate A: Slip-lining and Manhole Improvements
 1. GRP Slip Lining
 - iii. Alternate B: Cured-in-Place-Pipe (CIPP) Lining and Manhole Improvements
 1. CIPP in accordance with ASCE MOP 145
 - iv. Alternate C: Miscellaneous Sewer Improvement
 1. PWP requirements
 - b. Alternates A, B, and C have a fixed budget (\$2,500,000) that the Contractor shall submit a Quantity and Unit Prices (Labor, Material, Total Unit Price and Item Total) for the pay items identified within each Alternate bid. Unit prices provided for the specified pay items (Alternates A and B) or proposed pay items (Alternate C) in each Alternate will be reviewed by the Owner to assess the length of improvements that will be able to be completed within the allotted budget for those Alternates

- c. The Contractor may bid on any and all Alternates and is only required to bid on the Base Bid and at least one (1) of the Alternates. Only one (1) Alternate will be awarded if acceptable bids are received.
- d. The Contractor will be required after the contract is awarded and executed to develop and submit a Project Work Plan (PWP) that includes the following elements:

3. General Items

- a. Working Hours (730-730)
- b. Funding (WWIG)
 - i. Prevailing Wage Requirements
 - ii. BABA Requirements
- c. Subcontractors
 - i. BF.3 Subcontractors
- d. Alternative materials
- e. Change Orders
 - i. Must be approved by OWNER
- f. Addendums
- g. Project Requirements
 - i. Must be registered contractor with City of Marion
 - ii. Shop Drawings shall be submitted to ENGINEER for review and approval
 - iii. Submittals (Summary of Work)
 - iv. Inspection must be scheduled 48 hours in advance
 - v. Maintenance Bond

4. Reference Documents

- a. MACP Logs
- b. PACP Logs
- c. Laser Profiling Cross Sections
- d. Geotech Soil Borings (forthcoming)
- e. Original As Builts

QUESTIONS FROM BIDDERS

- Q1. Are Build American Buy American (BABA) guidelines required for material procurement?
- A1. No. Project is federally funded but does NOT require materials to meet the specific guidelines in the BABA Act.
- Q2. Is access to hydrants permitted and who is responsible to pay for the water used?
- A2. All Contractor's may contact the local Aqua Ohio contact Don Scott who will be able to provide provisions, protocols, and cost associated with hydrants and the subsequent water use. The Contractor is solely responsible to determine and coordinate their source for water necessary to complete their work and no additional payment will be made for the any time or costs associated with this work.
- Q3. Will Contractor's have access to GIS or any sewer mapping?
- A3. Atlas maps are included as a part of this addendum and are to be used for reference only. The sewer alignments on the drawings were surveyed and in general reflect the location of manholes and the alignment of the sewer.
- Q4. Was any flow monitoring performed and how were the flows determined in the 330130.03 Sewer Flow Control?
- A4. The flows were obtained from a calibrated hydraulic and hydrologic (H&H) model that was completed by separate consultant under a different project. This data utilized flow monitoring at the upstream and downstream end of this sewer. Flows are based on the average dry-weather flow in the sewer and the project peak flow observed in the model between MH1 and MH12A.
- Q5. Is it anticipated that bypass pumping is necessary for dry weather and more notably will be necessary for wet-weather flows?
- A5. The Contractor is responsible to determine the ultimate means and methods they are able to safely and effectively install the specified improvements within put causing additional damage within the sewer they are working in or causing disturbances to the flow or sewer directly up or downstream of the proposed work that of which may cause basement backups, flooding out of manholes, or buildup of debris that restricts flow within the sewer.

If the Contractor does not believe bypass pumping is necessary, they may elect to temporarily plug or dam flow upstream of the work while doing improvements. Similar to bypass pumping, temporary plugs or damming shall not cause any disturbances to the flow or sewer directly up or downstream of the proposed work that of which may cause basement backups, flooding out of manholes, or buildup of debris that restricts flow within the sewer. Any buildup or

damage that may occur due to this will be the responsibility of the Contractor to clean and remove and/or remediate at their cost.

- Q6. Is there consideration to altering the method of payment for bypass pumping?
- A6. Bypass pumping pay items have been removed and added under Part 1 General Items in the Prices to Include. The Contractor is responsible to determine their means and methods for maintaining or bypassing flow for during the course of all work and costs associated with the noted flow management or bypass shall be incorporated into all pay items.
- Q7. Will alternative manhole types and methods of installation be allowed in lieu of the specified manholes?
- A7. Any modification that differs from the specified manhole improvements or manhole replacement types shall require approval by the Engineer. Any modification to manhole improvements or other sewer improvements must meet at minimum the equivalent specified design criteria, match the general intent of the noted improvement, and not require any additional work not currently specified in order to install such alternative. If additional work is required that is not currently specified or noted, then the Contractor shall include that in the cost of their alternative method (pending approval by the Engineer.

It is generally recommended to send any alternative means or methods prior to the opening of bids for approval for there is not implied or actual guarantee that alternative methods will be approved after the awarding for bid.

- Q8. Will detours be allowed and who is responsible for implementing and maintaining?
- A8. Yes, detours are permitted, but will still need to be approved by the Engineer prior to implementing. The Contractor is responsible for implementing and maintaining detours and any other traffic control devices or methods necessary to complete their work.
- Q9. Is Channeline GRP panels an accepted manufacturer for the slip lining?
- A9. Yes.
- Q10. Is their access to CCTV videos, PACP and MACP Logs, and Laser Profiling?
- A10. Yes. See links:

PRICES TO INCLUDE

PART 1 - GENERAL

Any work shown on the plans or required in the specifications but not paid for separately as a bid item shall be included in the cost of other bid items. The amount bid for each Bid Item shall include the following:

- 1.1 All labor, materials, tools, equipment, and transportation necessary for the proper execution of the work in accordance with the Contract Documents.
- 1.2 All assistance required by the Engineer to verify compliance with the Contract Documents, including measuring for final pay quantities.
- 1.3 Project coordination and scheduling.
- 1.4 Detailed breakdown of lump sum bid items as requested by the Engineer.
- 1.5 All provisions necessary to protect workers, the general public, and property along the work in accordance with the Contract Documents.
- 1.6 Protection and/or replacement of existing property corner monuments.
- 1.7 Record drawings of the installed location of all underground electrical conduit, sewers, tees, wyes, laterals, etc.
- 1.8 Materials testing.
- 1.9 Reimbursement to Owner for costs of re-inspection or re-testing of any work not installed in compliance with the Contract Documents.
- 1.10 Construction staking of the improvements.
- 1.11 Bonds and Insurances
- 1.12 Mobilization and setup of laydown and storage areas for equipment, materials, tools, and other items necessary for construction of improvements.
- 1.13 Preconstruction video to document existing surface conditions prior to construction.
- 1.14 Maintaining traffic in accordance with ODOT Item 614 and the Ohio Manual of Uniform Traffic Control Devices, including all equipment, materials, and labor necessary to implement necessary devices. This includes any coordination and permitting associated with required detours during the course of construction.
- 1.15 Seeding & Mulching including grading, topsoil, seed, mulch, fertilizer, lime, watering & mowing.
- 1.16 All erosion control measures in accordance with the Contract Documents.
- 1.17 Shoring system design, material, and implementation
- 1.18 All submittals and design noted as required within the Summary of Work
- 1.19 Management of flows, including any and all equipment, materials, labor, and or appurtenances necessary to implement bypass pumping, for the installation of any and all improvements

These items shall cover both all work within the base bid and alternative bid that is awarded. The Contractor shall include these costs in the items associated with each alternative bid they submit for. It shall be noted that only one alternative bid will be selected along with the base bid and if the Contractor submits bids for multiple alternatives, each alternative will include these items plus the cost of the items associated with the Base Bid.

PART 2 - ITEMS

BASE BID – MANHOLE IMPROVEMENTS

All work proposed by this contract shall be quantified and paid for in accordance with the pertinent O.D.O.T. specification except as specifically altered by other provisions of this contract.

2.1 (604) MANHOLE REHABILITATION, CLEANING, REPAIRS, AND LINING, AS PER PLAN

Method of Measurement

The method of measurement shall be per each manhole to be repaired and rehabilitated as detailed and prescribed in the “Manhole Improvement Schedule” in the detailed drawings. No additional payment shall be made for any diameter or net area that exceeds a noted diameters within the schedule or variations in depth measured in the field by the Contractor.

Basis of Payment

The unit price paid shall include sewage flow control; cleaning, grouting and injection materials, lining of manhole, chimney seals, and the furnishing of labor, materials, tools and appurtenances necessary to complete the work as specified or as shown. The liner thickness shall be per the approved manufacturer’s recommendations. Any additional rehabilitation such as replacement of bricks or manhole patching necessary to complete the specified improvements that is not currently identified in the drawings shall be included within this item.

2.2 (611) MANHOLE, ADJUSTED TO GRADE, METHOD D.1, (BRICK), AS PER PLAN

The work, method of construction and materials for various street castings adjusted to grade shall be in accordance with ODOT Item 611 with the following modifications:

1. Metal adjusting rings or castings shall not be used. Existing risers shall be removed during the casting adjustment.
2. Brick used shall be clay or shale brick meeting the requirements of ASTM C32 sewer brick, Grade SM.
3. Concrete brick or masonry block shall not be used.
4. The height limitation for additional compensation shall be revised from one (1) foot to two (2) feet.
5. Type QC MS concrete shall be used for fill around all castings.
6. All costs for work and material associated with incorporating a new style casting designated by the City which may include steel plates, corbelling, and/or shifting the casting to its proper location shall be included in this Item.

Method of Measurement

The quantity to be paid for of each manholes adjusted to grade to be paid for shall be the actual number adjusted to grade in accordance with the contract, contract drawings and these specifications.

Adjusting to grade of items proposed for new or replaced construction as part of the project will not be measured and shall be paid for in the cost of installation of that item.

Basis of Payment

The unit price stipulated, each, for manholes adjusted to grade to be paid for under this Item shall be full compensation for furnishing and placing all material including removal, cleaning, storage and resetting of salvaged casting or new casting; pavement saw cutting, resetting of loose brick work if needed, 3/4-inch steel plates, and furnishing of all labor, tools, and necessary appurtenances to complete the work as specified or as shown on the contract drawings.

2.3 (611) SANITARY MANHOLE, ALL SIZES AND TYPES, AS PER PLAN

Method of Measurement

The number of each Type “E” manholes or manhole constructed using an access tee and riser with concrete collar (see construction detail “Access Riser & Reinforcement Installation”) to be paid for shall be the actual number furnished and built in place in accordance with the contract drawings and with these specifications.

Basis of Payment

The unit price bid for sanitary structures shall be irrespective of the depth of the manhole structures, and shall include the furnishing and construction in place of the manholes and junction chambers complete with excavation foundation; backfill; frame and cover; steps; concrete; steel reinforcement; lining material; bricks; mortar; plastering; precast manhole sections; access tee with riser pipe; concrete collar; transition; flexible joints; furnishing, installing and operating necessary pumps, pipes and appurtenances necessary for flow bypassing and/or trench dewatering granular backfill under proposed or existing pavements, walks, drives, existing drainage structures, and disposal of all undesirable material; testing and inspections; and the furnishing of all labor, materials, tools and appliances necessary to complete the work as specified or as shown. Adjustments in final casting elevations of plus or minus one (1) foot shall be included in the price for each structure.

The unit price shall also include the furnishing of all labor, materials, tools and equipment necessary to install and safely remove construction pits and pipe bracing as designated in the Detailed Drawings. Engineering details and plans associated with the submittals for these items shall be included in this pay item.

2.4 (611) 72 INCH SANITARY SEWER, ADDITIONAL FOOTAGE, CONTINGENCY, AS PER PLAN, AS DIRECTED

The work, method of construction and materials for sewer construction shall be in accordance with ODOT Item 611 with the modifications shown on the improvement plans and detailed in the specifications.

Method of Measurement

The quantity of sewer to be paid for shall be determined for gravity sewers by the linear feet difference in horizontal stationing from the tie in location at the manhole to the location where the sewer is joined with the existing brick sewer by concrete collar. If the sewer is joined between two sections of pipe, the difference in horizontal stationing from each concrete collar where the new point joins to the existing brick sewer shall be used to determine the linear feet installed.

Basis of Payment

The unit price stipulated per lineal foot for sewer pipe of the various sizes and types specified shall be irrespective of class of pipe and depth and if not called out as a separate pay item, shall be full compensation for maintenance of traffic for the duration of the project; earth and/or rock excavation for the pipe and foundation for same, including clearing and grubbing; removal of all materials necessary for placing the pipe, the complete removal hauling, and disposal of the existing sewer, manholes and catch basins except materials listed separately; furnishing and placing granular or concrete bedding and special backfill as required, testing of compaction, constructing and subsequently removing all necessary boring and receiving pits, cofferdams, cribs, sheeting and shoring; furnishing, installing and operating necessary pumps, pipes and appurtenances necessary for flow bypassing and/or trench dewatering; sealing or banding all pipe joints where required; furnishing and installing of the pipe jointing materials and all necessary plugs, bulkheads, bends, fittings, specials and branches of a type at least equal to the conduit of which it becomes part; furnishing and installing concrete encasements, boring and steel casing pipe where required; protection, verification and/or replacement of all existing utilities, i.e., gas mains, gas connections water mains (including hydrants and their connections to the main), water connections, water wells, septic tanks, sanitary sewers, sanitary connections, storm sewers, storm connections, curb drains, catch basins, culverts, electric or telephone underground cables and/or underground connections if damaged by the Contractor; protection of existing trees or vegetation; joining of the pipe to existing and proposed manholes, catch basins, structures, and other appurtenances as required whether temporary or permanent; leakage testing or internal videotaping; disposal of all surplus and unsuitable materials; furnishing and installing temporary stone trench topping of pavement and driveways; removal and replacement of poles, posts, signs, mailboxes, paper boxes, fences, landscape timbers, guardrails, sign wiring, fixtures and other appurtenances; removal and replacement of any damaged curbing, sidewalk, driveways, parking lots and roadways as directed by the Engineer; and the furnishing of all labor, tools, materials and equipment necessary to complete the work as specified or as shown.

2.5 (SPC) TYPE "C" PAVEMENT REPLACEMENT (ASPHALT), ROADWAY, AS PER PLAN

Method of Measurement

The method of measurement shall be as per ODOT 253 or 255 as applicable with the exception that lengths used for calculation of each individual repair area shall not exceed the maximum pay length indicated on the drawings.

Basis of Payment

The basis of payment shall be as per ODOT 253 or 255 as applicable with the following additions:

The unit price shall also include saw cutting; integral or non-integral curb removal; integral curb replacement; furnishing, installation, maintenance, removal, and disposal of temporary road materials or temporary pavement courses; preparation for permanent pavement courses; and any additional expenses for cold weather protection.

2.6 (603) 66 INCH - 84 INCH SANITARY SEWER HEAVY CLEANING, AS PER PLAN

Method of Measurement

The quantity to be paid shall be the number of linear feet cleaned per the specifications measured along the centerline of the pipe. Starting and end points shall be field determined and agreed upon by the Engineer and Contractor prior to commencement of cleaning.

Basis of Payment

The unit prices for the various sizes of pipes shall include furnishing water, cleaning equipment, root removal, the complete removal and disposal of debris as per NASSCO guidelines for heavy cleaning of sewers. This item shall include pre and post cleaning CCTV per NASSCO guidelines. Any section that is reviewed by the Engineer and determined to not be completing cleaned shall be recleaned and televised at no additional cost to the Owner.

2.7 (603) 72 INCH CURED-IN-PLACE PIPE LINING, AS PER PLAN

Method of Measurement

The quantity to be paid shall be the number of linear feet installed per the specifications measured inside wall to inside wall of manholes for the mainline. This pay item is for a 72" Egg sewer that has noted variations in height to width ratio. Any variation between MH1 to MH12, whether less or greater in total perimeter of or shape of the each cross section of sewer, shall not have any modification in price and the Contractor shall account for the variations when determining their unit cost.

Basis of Payment

The unit prices for the various thicknesses of liner pipe shall include sewer cleaning, measurements of existing pipe size and length to verify plan notes, determination of live connections, sewage flow control not included in other pay items, all liner system materials, installation, processing and cooling, sealing of liner at manholes, testing, post-installation video recording, cleanup, restoration, and the furnishing of all labor, material, tools and appurtenances necessary to complete the work in accordance with these specifications, the manufacturer's recommendations, or as shown. The minimum thickness of the liner material shall be as specified.

2.8 (603) 72 INCH SLIP LINING, AS PER PLAN

Method of Measurement

The quantity to be paid shall be the number of linear feet installed per the specifications measured inside wall to inside wall of manholes for the mainline. This pay item is for a 72" Egg sewer that has noted variations in height to width ratio. Any variation between MH1 to MH12, whether less or

greater in total perimeter or shape of each cross section of sewer, shall not have any modification in price and the Contractor shall account for the variations when determining their unit cost.

Basis of Payment

The unit prices for the various thicknesses of liner pipe shall include sewer cleaning, measurements of existing pipe size and length to verify plan notes, determination of live connections, sewage flow control not included in other pay items, all liner system materials, installation, processing and cooling (where necessary), sealing of liner at manholes, testing, post-installation video recording, cleanup, restoration, and the furnishing of all labor, material, tools and appurtenances necessary to complete the work in accordance with these specifications, the manufacturer's recommendations, or as shown. The minimum thickness of the liner material shall be as specified.

2.9 (SPC) MISCELLANEOUS SEWER IMPROVEMENT, AS PER PLAN

Method of Measurement

This item is designated for an alternative sewer improvement by the Contractor that is not explicitly specified in Alternative 1 or Alternative 2. The Contractor shall as a part of submitting a bid for this item provide the materials, means, and methods for installation of the proposed rehabilitation system. The item shall be paid for by per linear foot based on the horizontal stationing of from which the improvements start to where they are completed.

Basis of Payment

For interior rehabilitation based methods, the Contractor shall submit the unit prices for the various thicknesses of liner pipe shall include sewer cleaning, surface preparation, measurements of existing pipe size and length to verify plan notes, determination of live connections, sewage flow control not included in other pay items, all liner system materials, installation, processing and cooling (where necessary), sealing of liner at manholes, reinforcement, testing, post-installation video recording, cleanup, restoration, and the furnishing of all labor, material, tools and appurtenances necessary to complete the work in accordance with these specifications, the manufacturer's recommendations, or as shown. The minimum thickness of the liner material shall be as specified.

For any replacement or methods that requires excavation outside of installation access points, the Contractor shall submit a unit price stipulated per lineal foot for sewer pipe of the various sizes and types specified shall be irrespective of class of pipe and depth and if not called out as a separate pay item, shall be full compensation for maintenance of traffic for the duration of the project; earth and/or rock excavation for the pipe and foundation for same, including clearing and grubbing; removal of all materials necessary for placing the pipe, the complete removal, hauling, and disposal of the existing sewer, manholes and catch basins except materials listed separately; furnishing and placing granular or concrete bedding and special backfill as required, testing of compaction, constructing and subsequently removing all necessary boring and receiving pits, cofferdams, cribs, sheeting and shoring; furnishing, installing and operating necessary pumps, pipes and appurtenances necessary for flow bypassing and/or trench dewatering; sealing or banding all pipe joints where required; furnishing and installing of the pipe jointing materials and all necessary plugs, bulkheads, bends, fittings, specials and branches of a type at least equal to the conduit of which it becomes part; furnishing and installing concrete encasements, boring and steel casing pipe where required; protection, verification and/or replacement of all existing utilities, i.e., gas mains, gas connections water mains (including hydrants and their connections to the main), water

connections, water wells, septic tanks, sanitary sewers, sanitary connections, storm sewers, storm connections, curb drains, catch basins, culverts, electric or telephone underground cables and/or underground connections if damaged by the Contractor; protection of existing trees or vegetation; joining of the pipe to existing and proposed manholes, catch basins, structures, and other appurtenances as required whether temporary or permanent; leakage testing or internal videotaping; disposal of all surplus and unsuitable materials; furnishing and installing temporary stone trench topping of pavement and driveways; removal and replacement of poles, posts, signs, mailboxes, paper boxes, fences, landscape timbers, guardrails, sign wiring, fixtures and other appurtenances; removal and replacement of any damaged curbing, sidewalk, driveways, parking lots and roadways as directed by the Engineer; and the furnishing of all labor, tools, materials and equipment necessary to complete the work as specified or as shown.

2.10 (SPC) VOID FILL AND SEAL, AS PER PLAN

Method of Measurement

The quantity to be paid shall be for each individual location where injection of material to fill and seal the void is required. The amount of material shall to be paid under one (1) fill and seal shall be any space that requires filling within a 6' radius from the point of injection.

Basis of Payment

The unit price shall be irrespective of the depth of pipe and location of the void between manholes; equipment, tools, materials, and personal necessary to preform OSHA permitted confined spaced entries; all pumping required for adequate handling of flow bypassing, underground water and/or surface water; equipment and material required to fill voids from the within or above pipe; site cleanup; cutting of excess material after curing; removal, hauling, and disposing of excess void fill and sealant to an approved waste facility; pre and post construction video of each stretch of sewer in accordance with NASSCO PACP guidelines; photo/video documentation of joints prior to construction, during injection, after curing, and after restoration of surface; and the furnishing of all labor, materials, tools and appurtenances necessary to complete the work as specified or as shown.

"General Decision Number: OH20240001 11/08/2024

Superseded General Decision Number: OH20230001

State: Ohio

Construction Types: Heavy and Highway

Counties: Ohio Statewide.

Heavy and Highway Construction Projects

Note: Contracts subject to the Davis-Bacon Act are generally required to pay at least the applicable minimum wage rate required under Executive Order 14026 or Executive Order 13658. Please note that these Executive Orders apply to covered contracts entered into by the federal government that are subject to the Davis-Bacon Act itself, but do not apply to contracts subject only to the Davis-Bacon Related Acts, including those set forth at 29 CFR 5.1(a)(1).

Table with 2 columns: Contract conditions and applicable Executive Order (14026 or 13658) and wage requirements.

The applicable Executive Order minimum wage rate will be adjusted annually. If this contract is covered by one of the Executive Orders and a classification considered necessary for performance of work on the contract does not appear on this wage determination, the contractor must still submit a conformance request.

Additional information on contractor requirements and worker protections under the Executive Orders is available at http://www.dol.gov/whd/govcontracts.

** Workers in this classification may be entitled to a higher minimum wage under Executive Order 14026 (\$17.20) or 13658 (\$12.90). Please see the Note at the top of the wage determination for more information. Please also note that the minimum wage requirements of Executive Order 14026 are not currently being enforced as to any contract or subcontract to which the states of Texas, Louisiana, or Mississippi, including their agencies, are a party.

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at <https://www.dol.gov/agencies/whd/government-contracts>.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (iii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "identifiers" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than "SU" or "UAVG" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1,

2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the "SU" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

State Adopted Rate Identifiers

Classifications listed under the "SA" identifier indicate that the prevailing wage rate set by a state (or local) government was adopted under 29 C.F.R. 1.3(g)-(h). Example: SAME2023-007 01/03/2024. SA reflects that the rates are state adopted. ME refers to the State of Maine. 2023 is the year during which the state completed the survey on which the listed classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 01/03/2024 reflects the date on which the classifications and rates under the "SA" identifier took effect under state law in the state from which the rates were adopted.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter
- * a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour National Office because National Office has responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.
